Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-4, drawn to a composition or to a matrix or scaffold comprising same, classified in class 435, subclass 395.
- II. Claims 5-11, drawn to a production method, classified in class 264, subclass 494.
- III. Claim 12, drawn to a method for regenerating dermal or sub-dermal tissue, classified in class 623, subclass 15.12.

The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make another and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, the product as claimed can be made by another and materially different process, such as one involving chemical sterilization rather than electron beam radiation (i.e., limitations pertaining to biocompatibility, flexibility, etc., are not imposed in claims 1-4).

Inventions I and III are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case, the product as claimed can be used in other parts of the body or for culturing cells *in vitro*.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and divergent required searches, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
